

In the Abstract:

Please **replace** the paragraph at **page 13, lines 2 to 10**, with a replacement paragraph amended as follows:

An insulation arrangement for pipes, especially for pipes of a pneumatic system in a passenger transport aircraft, essentially ~~comprises~~ includes at least one insulation layer (6) as well as an outer sheath (3) consisting of titanium foil (31). ~~The invention consists in that the~~ outer sheath (3) is connected, in a first end section (32) and in a second end section (33), respectively with a termination profile (7), and thereby a shell (9) with at least one longitudinal seam (13) is formed, into which the insulation layer (6) is insertable.
